

Molecular Immunology Lecture

for students in Biology and Biochemistry

Summer semester 2023

Wednesdays, 13:00 - 14:30

Library, Institute of Immunology, Room 357

Dates	Lecturer	Topic
12.04.2023	Signal transduction of lymphocyte activation	O. Janssen
19.04.2023	Dynamics of T cell activation	M. Lettau
26.04.2023	Antigen-specific T cells in immune pathology, infection and cancer	A. Scheffold
03.05.2023	$\gamma\delta$ T cells in infection and cancer and functional phenotyping of T cells by flow cytometric methods	D. Wesch
10.05.2023	Cell growth and programmed cell death (I)	D. Adam
17.05.2023	Cell growth and programmed cell death (II)	D. Adam
24.05.2023	The germinal center response	A. Hutloff
31.05.2023	Regulatory T cells	P. Bacher
07.06.2023	Immunogenicity of biologicals	A. Kromminga
