

Connecting to the Datatransfer server

This server is for transferring data from lab devices (e.g. flow cytometers, TapeStation) to your own directory. Please delete data immediately after transfer. **Be aware that data will be automatically deleted after 60 days.**

Open *This PC* from the desktop or file explorer

From the ... menu, select *Map network drive*

Type in (copy/paste from here) the server IP-address:
\\172.22.240.44\Datatransfer

Select the checkbox *Reconnect at sign-in*

Finish
